# Práctica 2.4

## **Certificados**

# Index

1. Generar un certificado SSL autofirmado	.3
2. Configuración SSL en Apache NGINX	.3
3. Lo has certificado tu sinvergüenza	

#### Generar un certificado SSL autofirmado.

sudo openssl req -x509 -nodes -days 365 -newkey rsa:2048 -keyout /etc//nginx/ssl/ejemplo.key -out /etc/nginx/ssl/ejemplo.crt

### 2. Configuración SSL en Apache NGINX.

```
Nginx_Joselito [Corriendo] - Oracle VM VirtualBox
 jose@jose:/etc/nginx$ cd sites–enabled/
 jose@jose:/etc/nginx/sites–enabled$ ll
 drwxr–xr–x 2 root root 4096 Nov
drwxr-xr-x 9 root root 4096 Nov 19 15:31
lrwxrwxrwx 1 root root 34 Nov 7 14:16 default -> /etc/nginx/sites-available/default
 lrwxrwxrwx 1 root root
                                 47 Nov
                                            7 15:32 website-joselito.com -> /etc/nginx/sites-available/website
 joselito.com
 jose@jose:/etc/nginx/sites–enabled$ sudo nano website–joselito.com_
                                                                                    Nginx Joselito [Corriendo] - Oracle VM VirtualBox
                                                          You can move that to a different file under sites—available/ and symlink that to sites—enabled/ to enable it.
Con sudo nginx-s reload para reiniciar
                                                               listen 80;
el servidor.
                                                                                               website-joselito.com;
                                                               server_hams webstre
ssl_certificate /etc/nginx/ssl/babucertificado.crt;
ssl_certificate_key /etc/nginx/ssl/babu.key;
                                                               root /var/www/website–joselito;
index index.html;
                                                               location / {
     try_files $uri $uri/ =404;
                                                Nginx_Joselito [Corriendo] - Oracle VM VirtualBox
     jose@jose:/etc/nginx/sites-enabled$ sudo nginx -s reload
     jose@jose:/etc/nginx/sites–enabled$
```

### 3. Lo has certificado tu sinvergüenza.
